Data Analyst

Data Analyst with 5+ years of experience in data analysis, data quality, and AI annotation, transitioning into Data Science. Skilled in building predictive models, analyzing large datasets, and delivering insights that inform business decisions. Experienced in Python, SQL, Tableau, and Power BI, with a focus on model evaluation, data visualization, and practical problem solving.

Core Skills

- **Data Analysis:** hypothesis testing, regression, trend identification, A/B testing, Pipeline Pilot
- **Programming:** Python (Matplotlib, Seaborn, Scikit-learn), R, SQL, JUPYTER Notebooks
- **Data Visualization:** Tableau, Power BI, Looker Studio, Excel, Matplotlib, ggplot2
- **Machine Learning:** Classification, Clustering, Regression, Decision Trees, Random Forests
- **Database Management:** Data Cleaning, Data Mining, Querying Optimization

Work Experience

Data Analyst, Upwork Freelancing (December 2022 – Present)

- Executed end-to-end workflows involving advanced wrangling, multivariate analysis, and model development using Decision Trees, Random Forest, and Neural Networks to extract predictive insights from complex datasets with 95% accuracy.
- Built optimized Python (Pandas, NumPy, scikit-learn) and SQL pipelines, implementing 95% efficient classification models and evaluating performance with confusion matrices and related metrics to produce deployment-ready outputs.
- Applied inferential statistics and regression techniques with 95% accuracy which support predictive analytics initiatives.

Quality Analyst, HUGO (March 2021 – Present)

- Reviewed labeled datasets for AI/ML models, improving data quality by 10%, and model accuracy.
- Analyzed data to enhance workflows, increasing efficiency by 15%.
- Led a team to optimize annotation processes, boosting productivity by 20%.
- Acted in place of Senior QA Lead, managing a team of 30+ and ensuring timely delivery through cross-functional coordination

Data Annotator, HUGO (April 2020 – March 2021)

- Labeled over 400,000 data entries, contributing to a 90% model accuracy rate.
- Improved data quality by 15% by resolving technical challenges and streamlining workflows.

Freelance Writer, Fiverr (Feb 2018 – Jan 2020)

- Managed writing projects with strict deadlines, demonstrating strong communication and research skills.

Projects

Fraud Detection with Machine Learning

- Built fraud detection model on ~14K transactions with severe class imbalance (~0.19% fraud), applying scaling, outlier handling, and class weighting; achieved ~86% recall and ~75% precision on fraud cases with ROC-AUC $\approx$ 0.9996. View project.

E-commerce Sales, Customer Retention & Product Performance Analytics

- Developed an end-to-end analytics solution using SQL and Power BI to uncover customer behavior, revenue trends, and product performance, building a star-schema model and DAX measures to drive actionable insights; delivered interactive dashboards that identified retention patterns, high-value customers, and key revenue drivers. View project.

Projects (continued)

Customer Spend Prediction & Platform Optimization

- Built a regression model on ~500 customers ($R^2 \approx 0.99$) to predict yearly spending, analyzing engagement metrics (App, Website, Membership) and identifying membership duration as the key revenue driver guiding retention strategy; evaluated performance using MAE (~7.23) and RMSE (~8.93). [View project.](#)

Credit Risk Modeling for Loan Default Prediction

- Built models to predict loan default risk on ~9.5K Lending Club records, uncovering key risk drivers and identifying class imbalance that reduced detection of high-risk borrowers; evaluated performance using precision, recall, and confusion matrix. [View project.](#)

Education

NEXFORD University

- Master of Science in Data Analytics with Distinction, September 2024 - August 2025

COMPTIA Data+

- CompTIA Data+ — CompTIA, March 2026

UTIVA

- DATA SCIENCE, Mar 2022 - October 2022

Federal University of Technology Akure

- Bachelor of Science in Mechanical Engineering, Nov 2012 - Mar 2018

Certificates

IBM Data Analytics with Python, Data Science, UTIVA, Canvas Data Science for Decision Making, CompTIA Data+ — CompTIA, 2026, Accounting and Financial Reporting, Corporate sustainability

Professional Skills

Analytical Thinking, Stakeholder Communication, Problem Solving, Leadership, Process Optimization

Language

English and Yoruba Language
